Summary

Final-year Computer Science student with strong programming skills and hands-on experience in building AI-driven projects. Skilled in Python, SQL, and core computer science concepts with practical exposure to RAG systems and problem-solving through 200+ LeetCode questions. Passionate about writing clean, efficient code and learning end-to-end software development practices.

Education

Pranveer Singh Institute of Technology	2022– 2026
• B.Tech in Computer Science and Enginnering -Percentage-71%	
St.Peter's Inter College-	2020– 2022
• ISC-Class 12th-Percentage-75%	
St.Peter's Inter College-	2019– 2020
• ICSE-Class 10th-Percentage-78%	

Technical Skills

- **Languages:** Python, SQL.
- **AI/ML:** LLMs, RAG Systems, LangChain, Prompt Engineering.
- **Core Subjects:** DBMS,OOPs.

Projects

EdgeRAG: Offline Retrieval QA System	2024
• Built a fully offline Retrieval-Augmented Generation system using Python and local embeddings. • Implemented text chunking, vector search, retrieval, and context generation without relying on external APIs. • Designed a modular pipeline for PDF ingestion, vector storage, and query answering on local machine.	
RAG-IntelliAgent	2025
• Developed an agent-powered RAG pipeline using OpenAI, FAISS, and LangChain Agents for processing legal/financial documents. • Implemented components like semantic search, summarization, query decomposition, and reasoning agents. • Designed a clean multi-module workflow for retrieval → analysis → answer generation.	
AI-Driven Edge Node Optimization System	Ongoing
• Working on a system that tracks CPU, memory, and network usage of edge nodes in real time. • Using ML models to predict which node will get overloaded and which node is free. • Improving performance by sending requests to the best available node to reduce delay and increase speed.	

Certifications

- Oracle Certified: Generative AI (2025)

Acheivements

- Solved 200+ Problems On Leetcode
- Built 2 AI-powered projects with real-world document processing and deployment readiness.
